

PremierLED
lighting solutions

• Street light

Without a doubt PremierLed offers the best designed street lamp in the market. It's versatile, powerful, and its electronic development allows 3 different configurations to occur from the same optical base. These configurations will satisfy all of your needs with urban illumination including streets, avenues, and freeways where the distance between posts is up to 100 ft! Also, our lights will be able to provide greater cover for lower heights in public places, which will add to the benefits and savings in a much shorter term.

| | |
